

Welcome to

Freight and Logistics Strategy Consultation

Following the tough restrictions and economic challenges brought about by the Coronavirus pandemic, Brexit and the impending climate change crisis it is more important than ever for us to focus on the future potential of the region and deliver new opportunities for people in the North.

Freight and Logistics is an integral part of our work. Traditionally seen as a purely private sector entity, we've identified the industry as a key sector for enabling economic growth for the North of England.

Please take your time to read through the information, your feedback and input are essential in helping us set out the key investments in road and rail required to support a strong & growing freight and logistics sector in the North.
